

Cymphonix® Network Composer®

Network Composer is a deep-packet, Layer 7 inspection appliance that scans, identifies, and controls Internet traffic—and provides advanced content filtering, reporting, application prioritization, bandwidth management and threat protection capabilities.

NETWORK COMPOSER APPLIANCES INCLUDE:

Multi-layer Content Filtering. Ensure users can access the content they need with real-time dynamic URL categorization, URL database matching, URL keyword search and deep HTML inspection. Features like SafeSearch search™ engine enforcement will automatically detect and protect your network from dangerous or unwanted content.

Secure Traffic Filtering. Monitor, analyze and filter HTTPS traffic to eliminate threats or unwanted content hidden inside encrypted requests.

Anonymous Proxy Protection. Protect your organization against today's most sophisticated threats with hourly filter avoidance updates and dynamic content analysis that identifies and blocks dangerous anonymous proxies.

Internet Threat Control. Block web-based malware and viruses with advanced database matching and client spyware removal capabilities.

Bandwidth Shaping and Prioritization. Place precise limits on the amount of bandwidth available to specific applications, sites or users.

Content Shaping and Prioritization. Set limits or prioritize bandwidth based on specific URLs, domain names, content categories, MIME types and file types.

Application Control. Monitor application traffic to determine bandwidth requirements and set appropriate policy based priorities and limits.

Internet Usage Control. Reveal precise Internet usage, set appropriate policies and restrictions and automatically enforce those policies.

Reporting. Gain total visibility and enhance your ability to identify and fix problems with detailed reports on user activity, application traffic, potential Internet threats and much more.

Working together, these capabilities provide detailed, accurate information about the web traffic flowing through your organization, give you the application and bandwidth management tools you need to optimize performance, and provide unprecedented control over online content, applications, groups and users.

Reveal

Deep packet inspections and detailed reporting provide detailed, accurate information about the web traffic flowing through your organization.

Optimize

Precise, fine-grained application control, bandwidth management and content filtering capabilities keep your most critical content and applications secure, fast and available.

Protect

Proxy protection, content filtering and other advanced threat protection capabilities work together to identify and neutralize today's most sophisticated and dangerous Internet threats.

Network Composer is a secure Web gateway appliance that sits between your corporate firewall and network switches. It comes fully-loaded with everything you need to reveal, optimize and protect your Internet connection. It features a convenient and powerful Web-based management console and receives frequent automatic updates to protect your organization from emerging threats.

Finding the Right Appliance for Your Network

Network Composer offers a complete range of secure web gateway solutions for businesses, governments, schools, and universities of all types and sizes:

PRODUCT	INTERNET SPEED	NETWORK INTERFACES	USER LICENSE RANGE	CONTENT FILTERING	REPORTING	PERFORMANCE CONTROL	SSL ACCELERATION
DC10	2 Mbps	10/100 RJ45, 2 ports	25-250	✓	✓	✓	
DC20	5 Mbps	10/100 RJ45, 2 ports	25-250	✓	✓	✓	
DC30	8 Mbps	10/100 RJ45, 2 ports	25-2,500	✓	✓	✓	
DC30X	20 Mbps	10/100/1000 RJ45, 2 ports	100-5,000	✓	✓	✓	
DC30XS	20 Mbps	10/100/1000 RJ45, 2 ports	100-5,000	✓	✓	✓	✓
